About Me

I define myself in 3 words:
Objective, Efficient, and Learner.
I strive for objectivity, prioritize efficiency through organization, and learn quickly from mistakes to improve continuously.
Patience and empathy with clients are fundamental in my service-oriented approach, combined with a touch of extroversion.

More Information

Curious about new technologies and deeply passionate about sound and the entertainment industry.

Work Experience

RUMS - Rent to rent real state start-up

- **Digitalization:** Implemented technological solutions that automated key processes, reducing billing time from one month to three days.
- **Accounting:** Managed invoicing and accounting using Holded, optimizing financial control and ensuring efficient resource management. Automated the collection process for over 3,000 invoices per month, ensuring better financial tracking and accuracy.
- **Operations Management:** Oversaw client relations, maintenance, supplies, and other company resources, ensuring smooth operations and high tenant satisfaction.

Other experiences

Basic Web Development

- MongoDB
- Fast API
- Vercel Vo AI

Room Sound System & Audio Design

- Experience with analog mixers, acoustic setups for small rooms and DJ & live events equipment and software.
- Sound designer at **Quboo**, a video game development project based in Spain, where I collaborated with some friends to create new indie projects.
- Euphoric Madness: music & DJ personal project
